LIN HUA CHUNG

Software Engineer | Frontend & AI-Assisted Development

Ho Chi Minh City, Vietnam • (+84) 849966277 • chunglh1304@gmail.com • www.chunglh.com

SUMMARY

Software Engineer with 4+ years of experience building enterprise web applications using **ReactJS, Next.js,** and **TypeScript.** Experienced in banking customer onboarding, performance optimization, and AI-assisted development using **Cursor AI** and **OpenAI Codex.** Hands-on experience with CI/CD pipelines, **production releases,** and cross-functional engineering teams.

EDUCATION & CERTIFICATIONS

Bachelor of Science in Computer Science 2016 – 2020

Ho Chi Minh City Open University

Full-Stack Developer Certificate Grade: 9.0 / 10.0

Cybersoft Academy

TECHNICAL SKILLS

Frontend Core:	**ReactJS, Next.js** (App/Pages Router, SSR, SSG), **TypeScript,** JavaScript (ES6+), HTML5, CSS3, SCSS, **Tailwind CSS**
AI-Assisted Engineering:	**Cursor AI, OpenAI Codex,** AI-assisted Code Review, Prompt Engineering, Code Refactoring, Solution Evaluation
DevOps & CI/CD:	**Jenkins, Harness CI/CD,** GitLab CI/CD, GitHub Actions, **Docker,** Vercel, AWS (S3/EC2 basic)
State & UI Architecture:	Redux Toolkit, **TanStack Query,** Zustand, React Hook Form, Formik, Yup, Zod, Material UI, Ant Design
Backend & Testing:	**Node.js,** Express.js, RESTful APIs, MounteBank, Jest, **React Testing Library,** Postman, Swagger, Git

SOFT SKILLS, LANGUAGES & AGILE

English:	Workplace communication, technical discussions, and documentation.
Agile / Scrum:	Daily Stand-ups, Backlog Refinement (Grooming), Sprint Planning, Technical Discussions, and Retrospectives.
Soft skills:	Cross-functional collaboration, problem-solving, adaptability, and ownership.

WORK EXPERIENCE

NAB Innovation Centre Vietnam — Software Engineer 03/2025 – Present

- Developed customer onboarding features using **ReactJS, Next.js, and TypeScript,** focusing on reusable components, dynamic forms, and application performance.
- Integrated **Cursor AI and OpenAI Codex** into daily development workflows for feature implementation, debugging, refactoring, and unit test creation.
- Used **AI-assisted code reviews** to identify potential issues and improve code quality before submitting pull requests.
- Reviewed **AI-generated solutions** for correctness, security, and maintainability before applying them to banking applications.
- Built **schema-driven dynamic forms** with real-time validation and optimized rendering to improve form responsiveness and rendering performance.
- Collaborated with BAs, UX designers, backend engineers, and DevOps teams to deliver features and support production releases.

WORK EXPERIENCE

Mercatus Technologies Inc — Frontend Developer
03/2024 – 03/2025

- Led UI development for an enterprise e-commerce platform serving retail and grocery customers across the U.S. and Canada.
- Built and optimized 30+ **reusable UI components** using AngularJS and ReactJS, ensuring cross-device compatibility.
- Configured automated frontend build checks and deployment workflows using GitLab CI/CD and **Vercel preview environments.**
- Mentored junior developers, conducted code reviews, and followed web accessibility best practices.

BAP IT Co., JSC — Fullstack Developer
02/2022 – 02/2024

- Worked directly with Japanese clients to clarify requirements, discuss technical solutions, and resolve development issues.
- Delivered end-to-end web features using ReactJS, Node.js, and Express.js for enterprise applications.

FPT Software — Frontend Developer
10/2021 – 01/2022

- Developed internal banking data management tools using Websquare5, HTML/CSS, and JavaScript.

KEY PROJECTS

JoinNAB - Digital Customer Onboarding Platform
03/2025 - Present

NAB Innovation Centre Vietnam | Software Engineer | Team size: 50+

Frontend: ReactJS, Next.js, TypeScript
API testing: MounteBank
AI tools: Cursor AI, OpenAI Codex
Release & delivery: Docker, Jenkins, Harness CI/CD

- **Dynamic form architecture:** Built **schema-driven multi-step forms** for identity verification, customer information collection, and product registration.
- **API mocking & testing:** Mocked backend microservices with **MounteBank** to enable independent frontend development and early integration testing.
- **AI-assisted engineering:** Used **Cursor AI and OpenAI Codex** to explore solutions, generate test cases, and review changes against banking requirements.
- **Production releases:** Prepared **Production Run Sheets**, monitored **Jenkins and Harness CI/CD** pipelines, and supported deployment coordination and post-release verification.

Mercatus Enterprise E-Commerce Platform
03/2024 - 03/2025

Mercatus Technologies Inc | Frontend Developer | Team size: 30+

Frontend: AngularJS, ReactJS, Next.js
Platform & APIs: Drupal CMS, RESTful APIs
CI/CD & hosting: GitLab CI/CD, Vercel

- **Reusable UI:** Built and optimized **30+ reusable UI components** with AngularJS and ReactJS, ensuring cross-device compatibility.
- **API integration:** Integrated **payment gateways, order processing, and shopping cart APIs** for online grocery platforms.
- **Preview deployments:** Configured **Vercel preview environments** so product managers and QA engineers could validate features before production.
